

MultiSim Setup

Last updated 2/2/22

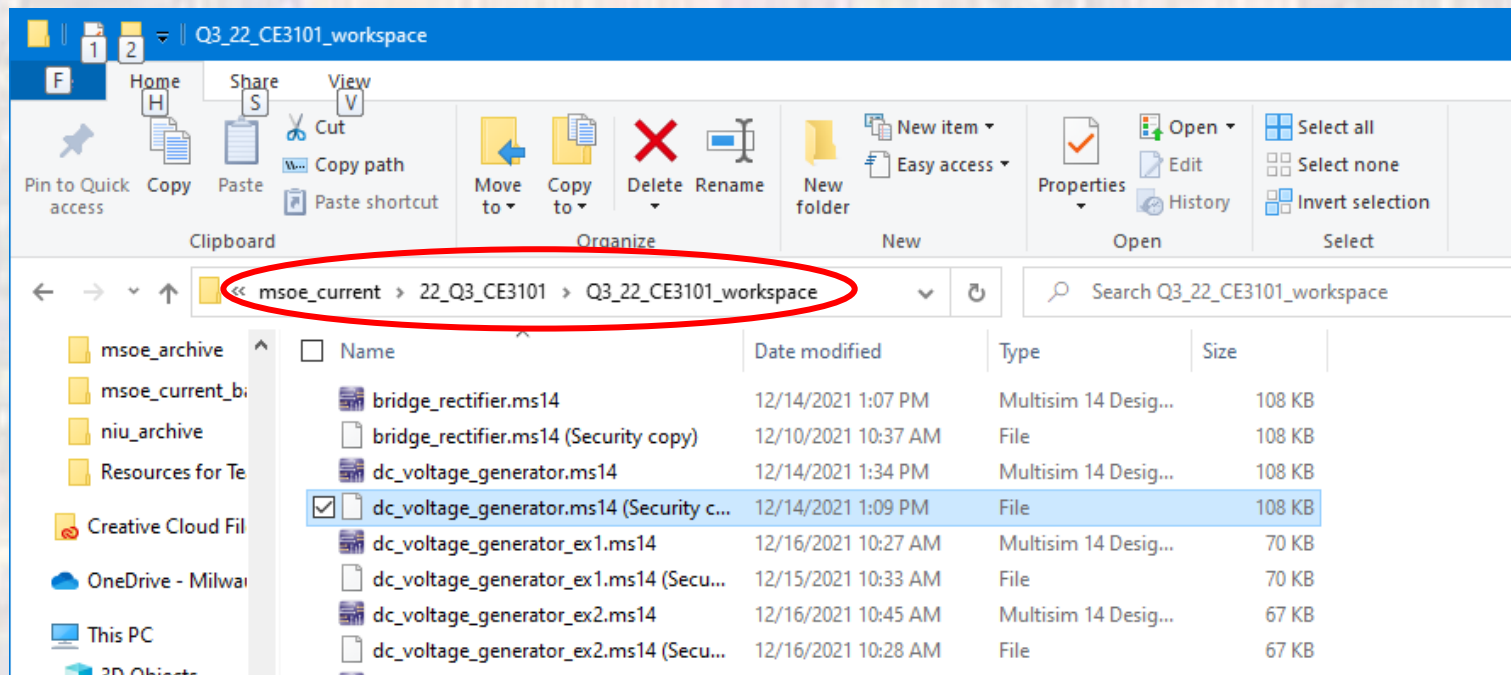

MultiSim Setup

- Go to Software Center
 - Download NI Multisim (14.0.1)

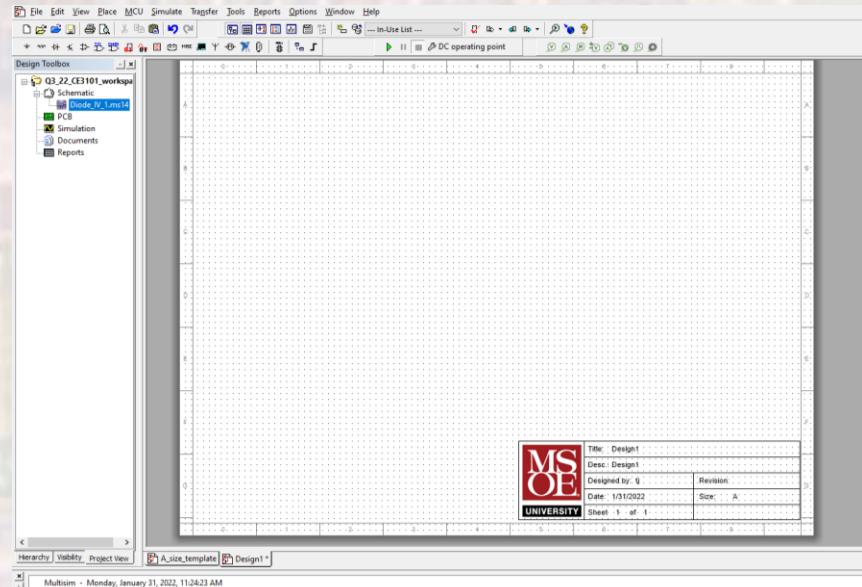

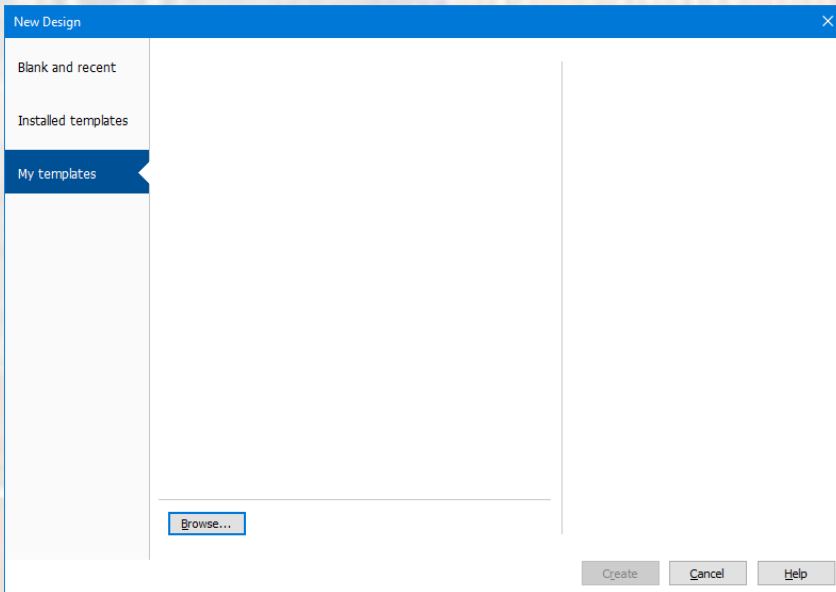

MultiSim Setup

- Create a directory in **YOUR** file system (not under the MultiSim directory) to store your files
- I like to use the `quarter_class_workspace` name for all my software tools
- **No** spaces in the directory path

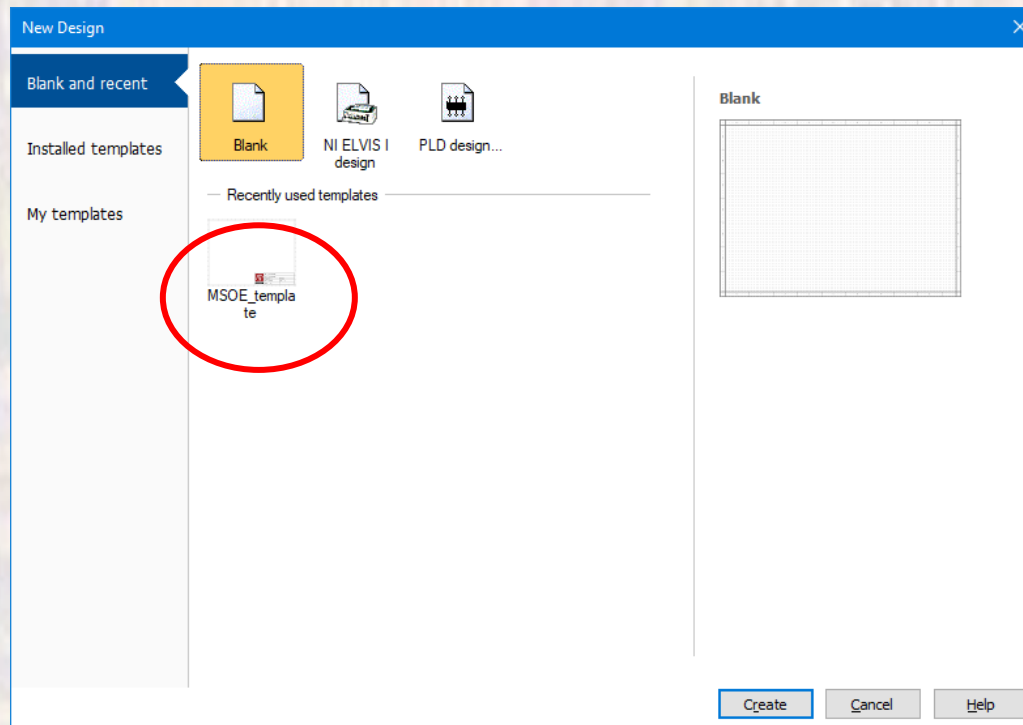

MultiSim Setup

- Install MSOE Template
 - Download the MSOE_Template from the website
 - [rt click](#) and select [Save link as](#) to save into your project workspace
 - In MultiSim: **File** → **New**
 - Select **My templates**
 - Browse to your workspace and select MSOE_template
 - Close the file

MultiSim Setup

- Use MSOE Template
 - **File** → **New**
 - Select **Blank and Recent**
 - The MSOE template should be available under Recently used templates

MultiSim Setup

- Use MSOE Template
 - A new design will be opened
 - The title block fields will auto-fill
 - The Desc block is the **ONLY** item you should change
 - **Double-click** on the **Title Box** and type in an appropriate description
