

About These Web Pages

The opinions or statements expressed herein should not be taken as a position or endorsement by Milwaukee School of Engineering.

These web pages were created using HTML5. As an educator I felt it was important that the HTML be reasonably readable. In my experience most HTML created by WYSIWYG programs is very hard to decipher.

To see the source simply right click and select "view page source". To see the CSS file (formatting file), view the source and click the "base.css" link on or around line 10.

These pages were created using the free Komodo-edit software based off of the Komodo IDE from Active State - <http://komodoide.com/komodo-edit/>.
