# EE 2905

Dr. Johnson

Homework 1

1 – Create a Flow Diagram for a program that reads in 10 numbers, computes the average, and prints the result. 40pts

2 – Create a Flow Diagram for a program that continuously reads in a new number, compares it to the current saved value, then saves the larger of the two. After every 10th new number it prints out the new saved value. 60pts
