

EE 2905
Lab #x

Your Name
Date of report

Lab Title

Objectives:

Description of the objectives of the lab in your own words.

Procedures:

Description of what you did in the lab. This may include sub-sections on pre-lab, design, test, and debug. Reference figures, pictures, code and schematics in the appendix by name or number.

Results:

Description of results from the lab. Reference figures and pictures in the appendix by name or number.

Observations and Conclusions:

Description of any observations or insights you gained from the lab as well as an overall conclusion with respect to the lab objectives.

Appendix and References:

Appendix with labeled figures, pictures, tables, code, and schematics.

List of references.

** The first 4 sections should be no longer than 1 page for an informal lab report.

** The appendix can be as long as necessary and should err on the side of too much information vs too little.
