

Project Management

Last Updated 6/30/22

Project Management

- Project Location
 - We will be using the online [Keil Studio Cloud](#) project system
 - All of your projects will be stored in the cloud
- Naming
 - Absolutely no spaces in file or project names
 - use underscore instead: lab3_project
 - File names must be descriptive
 - lab3_part1_project or continuous_average_project

Project Management

- Project Archive
 - You will want to create your own copy of your project files
 - In case you lose your Keil Studio Cloud account
 - For future use without using Mbed / Keil Studio Cloud
- In the Keil Studio Cloud IDE
 - **Rt-click** on the project you want to archive
 - **Select Download Current Selection**
 - A **xx.tar** file will be created and saved into your downloads folder
 - **Move** the **xx.tar** file to a safe location
- You can traverse into the **xx.tar** file to access your code (main.c)
 - **Rt-click** on the **xx.tar** file and **select 7-zip** then **select open archive**
