EE4980

Project Requirements

Project Requirements

- Your project is to create a set of PowerPoint slides similar to those used in class.
  - These slides should be suitable for use in EE4980 or in a professional setting to bring your colleagues up to speed on a new topic
  - Slides should include:
    - Overview
    - Physical implementation
    - Block diagrams or similar
    - Electrical content
    - Protocol or requirements
    - Any other content required to understand the technology
  - A typical presentation would be 30 slides

  - All material must be original or attributed

Project Requirements

- You may choose your own topic

- Example projects include (but are not limited to):

    - Noise Cancellation
    - Trellis Coding
    - Zigbee
    - Plasma TV
    - MIDI
    - Micro-mirror displays
    - Powerline Communications
    - ABS

    - Choose something you are interested in

Project Requirements

- These are individual projects – no teams

- Send an email to Dr. Johnson to get your topic approved

- Due – Last day of Class – 4:00 PM
                via EMAIL
