PRINTING QUARTUS SIMULATION WAVEFORM RESULTS

The Quartus 13 university program simulator does not allow direct printing of simulation waveforms. But, you can still submit simulation printouts by using the Windows screenshot feature.

1. Size and arrange the simulation results waveform
    window as you want it to appear on your printout. Use Ctrl+Space and Ctrl+Shift +Space to scale the time axis to view all 8 input combinations clearly.

2. Press Alt+Fn+PrtSc (or, if you have a keyboard with a dedicated Print Screen key, Alt+PrintScreen)

3. Launch Windows 7 Paint (Windows key, paint, enter)

4. Click the Paste button

5. Click the Crop button before doing anything else

6. Press Ctrl-P to print

7. Select your printer and click Print.
