

CS2911 Lab2 Feedback Summary

Revisions that help meet my goals for the lab

- Revise prelab written instructions
 - (2?) De-fluff the description a bit
 - Revise Lab 2 Example – confusing because it had more information than was actually needed
 - Add more details (done)
 - Show where to look more clearly (done)
 - Reference Section 3.3.1 in the text (done)
 - Include diagram or reference RFC (done)
 - Define table layout clearly (done)
- In class, talk about UDP before the lab – explain "anatomy" of a UDP packet
 - Explain 32 bit size label on the figure in the book (done – see Instructor Notes)
- At start of lab period (not near end), demonstrate Wireshark, (done – see Instructor Notes)

Revisions do not help me meet my goals for the lab

- In class, talk about UDP before the lab – explain "anatomy" of a UDP packet
 - Give complete UDP example before lab
 - (3) Explain fields in class
 - Walk through Python code
- Put Wireshark demo steps into lab instructions

Positive Comments about the lab

- (2) Have students send their own messages
- (2) Lab was easy
- Predicting packets was enjoyable
- "I did not feel comfortable with how the components worked with one another. Since you said in class that you intentionally did this and we will get the material later in the quarter then there is nothing that I would change about the lab."
